Office Action Summary	Application No. 10/598,613	Applicant(s) PEUKER ET AL.	
	Examiner JENINE M. PAGAN	Art Unit 3728	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-10, 20-26, drawn to mixing capsule with by-pass means.

Group II, claim(s) 11-19, drawn to storing capsule with hardenable sealing means.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The prior art has been identified as document WO 00/23002 A (DENTSPLY INT INC) and discloses:

- a capsule for storage and mixing and dispensing of material comprising:
- a capsule body member (10) providing a main chamber (8), and comprising a dispensing opening (13);
- an applicator member (20) being slidably accommodated in said capsule body member, said applicator member (20) providing an auxiliary chamber (50); and an activator member (40) being slidably accommodated in said applicator member; said

Art Unit: 3728

main chamber and said auxiliary chamber being selectively connectable for fluid communication between said chambers upon activation of said capsule by said activator member (see page 7 lines 2-4 and figure 1)

It follows that the following technical features make a contribution over the prior art and can be considered as special technical features within the meaning of Rule 13.2 PCT:

Claim 1: through-hole extending from the auxiliary chamber to the outer surface of the applicator member and a recessed area in the inner wall of the capsule.

Claim 11: internal channel system extending from the rear end of the activator member to an annular groove remote from the rear end of said activator member.

The problem solved by these special technical features can therefore be construed as:

Invention I: Providing a capsule for storing, mixing and dispensing material having an alternative way to mix the two components.

Invention II: Hermetically sealing a capsule after it has been filled in with components.

The identified special technical features are not the same and do not correspond as they solve different problems. Consequently, this authority considers that the separate inventions or groups of inventions mentioned above are not so linked as to form a single general inventive concept.

3. A telephone call was made to Peter Olsen on 9/12/2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JENINE M. PAGAN whose telephone number is
